DOING BETTER AT QUALIS, THE BRAZILIAN SCIENTIFIC INDEXER...
Alexandre Reis Graeml

Focus on organizations

THE SOCIAL DIMENSION IN THE STRATEGIC ALIGNMENT BETWEEN IT AND THE BUSINESS
Gustavo Abib, Norberto Hoppen, Eduardo Henrique Rigoni

AN EXPLORATORY ANALYSIS OF THE USE OF SOCIAL NETWORKS ON THE INTERNET AS A TOOL FOR KNOWLEDGE MANAGEMENT
Rodrigo Sandoval-Almazán, Rocio Gomez Diaz

ANALYSIS OF CRITICAL SUCCESS FACTORS OF BUSINESS PROCESSES' MANAGEMENT IN GOVERNMENT
Higor Monteiro Santos, André Felipe Santana, Carina Frota Alves

FEATURES OF THE MARKETING INFORMATION SYSTEM AND THEIR CONTRIBUTION TO THE COMPETITIVE EDGE OF A RETAIL FASHION STORE
Josimeire Pessoa de Queiroz, Braulio Oliveira

Focus on people

RELEVANT INDIVIDUAL COMPETENCES FOR CHIEF INFORMATION OFFICERS ACCORDING TO THE PERCEPTION OF IT PROFESSIONALS
Edimara Mezzomo Luciano, Carlos Alberto Becker, Mauricio Gregianin Testa

ONLINE PURCHASE INTENTION: AN ADAPTED TECHNOLOGY ACCEPTANCE MODEL APPLIED TO E-COMMERCE
Luana de Oliveira Fernandes, Anatália Saraiva Martins Ramos

Focus on technology

A DATA WAREHOUSE ARCHITECTURE FOR THE SUPPORT TO PROJECT MANAGEMENT IN THE DEVELOPMENT OF DISTRIBUTED SOFTWARE
Clara Aparecida Milanez, Tania Fatima Calvi Tait

FUZZI LOGIC APPLICATION IN SOFTWARE PROJECTS' TIME ESTIMATION
Rúbia Eliza de Oliveira Schultz Ascari, Beatriz Terezinha Borsoi, Kathya Silvia Collazos Linares, Luiz Fernando Toscan

PROPAGATION OF IDENTITY AND EXECUTION OF AUTHORIZATION RULES FOR EFFECTIVE INFORMATION SYSTEMS' DATA ACCESS CONTROL
Felipe Leão, Sergio Puntar, Leonardo Guerreiro Azevedo, Fernanda Baião, Claudia Cappelli

This is an electronic journal. There is no printed version of it. However, if you want to print a paper, you can still do it in an environmentally conscious way. It was desktop edited using *Eco Sans*, a font that requires less ink to be printed.

Embora, até o momento, não tenhamos conseguido atingir nossa meta de ter a RESI reconhecida ao menos como B2 nas áreas de Administração e Informática, que são as áreas da maioria dos nossos autores e leitores, a RESI continua subindo na avaliação realizada pela Capes. Como nos próximos anos a tendência é que se venha a prestar um pouco mais de atenção ao "fator de impacto" das revistas brasileiras, é de se esperar que a RESI avance ainda mais. Embora a maioria dos periódicos nacionais não esteja incluída no JCR e no Scopus - os principais indexadores em nível mundial - é fácil constatar que estamos no caminho certo. Basta utilizar o programa "Publish or Perish", ou qualquer outros similar disponível na web, para perceber que a revista é mais citada no Google Scholar - seguramente a mais democrática e inclusiva entre as bases de conhecimento - do que muitas das revistas que hoje compõem os extratos B1 e B2 do Qualis. Em algum momento, isto vai ser reconhecido!

É claro que podemos melhorar ainda mais nosso desempenho. Basta que a gente (autores brasileiros e de outros países latino-americanos) passe a olhar mais e valorizar o trabalho dos colegas da nossa região, citando-os em seus seus

Although we still have not reached our goal of having RESI acknowledged as a B1 or B2 journal in Qualis, the Brazilian main scientific journal indexer, we are going up the scale. As soon the Brazilian journals will start being measure according to their impact factor, we expect RESI to progress even further. The majority of Brazilian good academic journals in business and information systems are not indexed by JCR or Scopus. That also happens to RESI. However, when we use "Publish or Perish", or any other similar software to check the journal's impact on the web, it is clear that RESI already deserves to be better ranked and that will have to be acknowledged some time. For now, we are happy to be able to publish the work of some of the most notorious Brazilian researchers in IS (and other Latin American good researchers have joined them in the last few years), as well as providing younger researchers with an opportunity of exposing their work to our research community!

Of course we can still improve our performance, with respect to our impact factor. In order to do that, Brazilian and other Latin American researchers should give more value to research that is developed regionally, reading and quoting

próprios trabalhos.

A RESI se propõe a ser um veículo para a promoção da pesquisa sobre sistemas de informação desenvolvida por latino-americanos, sobre a América Latina e para latino-americanos, embora não feche as portas a autores de outros cantos do mundo, como tem ficado evidente nas edições recentes da revista, com textos também de autores europeus e norte-americanos.

Boa leitura a todos!

Alexandre Graeml
Editor-chefe

the work of their Latin American colleagues. RESI will always promote that, because the development and use of technology is socially and culturally influenced.

RESI will never close its doors to researchers from other parts of the world, but it is specially committed to supporting Ibero-American research in the field of IS, as it is noticeable in recent issues, that always bring at least one paper from our colleagues from Latin America, Portugal or Spain.

I hope you all enjoy this new issue!

Alexandre Graeml
